

SAM SUNIL

DEVOPS & SITE RELIABILITY ENGINEER

AWS | CI/CD | Docker | Kubernetes | Terraform | GCP | Linux

📍 Alappuzha, Kerala, India • 📞 +91 9048592292 • ✉️ sam.sunil@hotmail.com • 🔗 linkedin.com/in/sam-sunil •

PROFESSIONAL SUMMARY

Certified **DevOps & Site Reliability Engineer** with 4+ years of experience leading CI/CD modernization projects that reduced deployment times by **30%–45%** and managing cloud-native infrastructure supporting **99.99% uptime** across AWS and GCP using **Kubernetes, Docker, Terraform, and Ansible**. Adept at implementing end-to-end automated CI/CD pipelines (Jenkins, GitHub Actions, AWS CodePipeline, GitLab), automating operational workflows using Python & Bash, improving system availability, latency, and performance metrics, and leading root cause analysis (RCA) and post-mortem incident response. Certified **Google Cloud Associate Cloud Engineer (GCP ACE)**.

CORE COMPETENCIES & TECHNICAL SKILLS

Cloud Platforms:	AWS (Primary), GCP (Certified), Azure (Basics)
Containers & K8s:	Kubernetes (K8s), Docker, Helm Charts, Argo CD, ECS, Container Orchestration, Microservices
IaC & Config Mgmt:	Terraform (Modules & State Mgmt), AWS CloudFormation, Ansible (Playbooks & Roles), AWS SSM
CI/CD & Versioning:	Jenkins Pipelines, AWS CodePipeline, GitHub Actions, GitLab CI/CD, Git, GitHub, Bitbucket, CodeCommit
Programming & Scripting:	Python (Boto3, Automation Scripts), Bash / Shell Scripting
Monitoring & SRE:	Grafana, Prometheus, AWS CloudWatch, New Relic, Icinga, Azure Alerts, RCA & Post-Mortem Analysis
Operating Systems:	Linux (Ubuntu, Debian, RHEL, CentOS), Windows Server Administration, Web Servers (Nginx, Apache)

PROFESSIONAL EXPERIENCE

IBS Software — Product Engineer — DevOps Feb 2026 – Present

- Architect and maintain production-grade cloud infrastructure and multi-zone **Kubernetes (EKS/GKE)** clusters hosting high-throughput SaaS product microservices.
- Implement automated **GitOps CI/CD and Jenkins pipelines** using GitHub Actions and Helm charts, decreasing release deployment lead time by **45%** with zero-downtime rolling updates.
- Standardize infrastructure provisioning across cloud environments using modular **Terraform** and automated server configuration using **Ansible**.
- Enforce least-privilege cloud security frameworks, AWS KMS encryption, and centralized secret synchronization via AWS Secrets Manager and SSM Parameter Store.

Qburst Technologies Pvt. Ltd. — CloudOps Engineer Nov 2023 – Jan 2026

- Designed and managed scalable, secure cloud environments tailored to client needs across **AWS and GCP**, supporting **99.9% system uptime**.
- Automated operational tasks and routine maintenance with **Python and Bash**, improving team productivity by **25%**.
- Implemented multi-platform CI/CD pipelines (Jenkins, GitLab CI, AWS CodePipeline) to accelerate release velocity and eliminate manual deployment errors.
- Led performance tuning, auto-scaling configuration, and system availability optimization initiatives across client workloads.
- Participated in 24/7 on-call rotations, handling production incidents related to service downtime, deployment failures, and system performance degradation while documenting RCA reports to enhance system reliability.

SupportSages Consultancy Services Pvt. Ltd. — DevOps Engineer / System Administrator Sep 2021 – Nov 2023

- Led CI/CD implementations using **AWS CodePipeline and Jenkins**, cutting release cycles by **30%**.
- Built and maintained automated Infrastructure as Code (IaC) deployments using **Terraform and AWS CloudFormation**.
- Managed containerized deployments on **Kubernetes and AWS ECS** with automated rolling deployments.
- Set up comprehensive monitoring and alerting dashboards with **AWS CloudWatch, Grafana, and Icinga**.
- Conducted post-mortem analyses for critical incidents to ensure continuous system reliability and zero data loss.
- Collaborated with development teams to enforce DevSecOps practices, backup automation, and disaster recovery strategies.
- Effectively troubleshooted Linux and Windows servers, showcasing deep proficiency in Linux system administration, shell scripting, permission management, and server hardening.

KEY PROJECTS & IMPLEMENTATIONS

Employee Relieving Portal — Python, Docker, PostgreSQL, RBAC, CI/CD

- Engineered an automated enterprise offboarding and clearance processing platform with role-based access control (RBAC), multi-tier approval states, and automated document generation.

- Containerized services using Docker, established automated CI/CD deployment pipelines, and configured persistent storage with automated backup strategies.

Ansible Playbook for Windows RDP & Server Fleet Management — [Ansible](#), [Bash](#), [Linux](#)

- Automated updates of RDP ports and credential rotations across a fleet of Windows and Linux servers, enhancing security posture and minimizing manual intervention.

Krypton — Cloud Infrastructure Platform — [Kubernetes](#), [Docker](#), [Argo CD](#), [Helm](#)

- Engineered a cloud-native platform orchestrating containerized microservices across Kubernetes with automated GitOps delivery pipelines.

EDUCATION

B.Tech in Computer Science & Engineering 2017 – 2021
Albertian Institute of Science & Technology (AISAT)

Higher Secondary Education
St. Francis Assisi HSS, Arthunkal

CERTIFICATIONS & DETAILS

Google Cloud Associate Cloud Engineer (GCP ACE) Issued 04/2024

[Google Cloud Certified](#)

Languages: English (Full Professional), Malayalam (Native), Hindi, Tamil

Availability: Rotational shifts & 24/7 on-call production support
